Every American uses automobiles, light trucks, or recreational vehicles tremendously for their travel according to American Automobile Associations (AAA). It was the record for the Americans in 2004 for using huge amount of vehicles. Approximately 63 million Americans visited with their families in holidays. According to the report of AAA, 21% of total people (Apx. 295 million) traveled more than 50 miles to see loved ones in America now. Statistically it is described as 81% of them (63million) 50.9 million people used their automobiles, 3.2 million (5.3 %) went by train, bus or any other way and rest 8.6 million (13.7%) went by flight for their traveling everyday.

Here are some reasons for taking car instead of another form of transportation for People:

- It will be easy for you to take car in stead of other transportation. You no need to coordinate with other transportation schedule. So it is better to jump into your car for your destination.
- Of course car is cheaper than any other transportation. You are no need for buying tickets as like plane or train, if you do have a car. It will better convenient for your whole family to move in car rather than any other transportation.
- If you afraid to fly, then go for car. Although this is an irrational fear as flying in planes is statistically safer than driving in cars, it is very hard to overcome.
- Try to comfortable in your own car. You can dress yourself according to your interest. Even you can drive without shoes if you want. Just like being at your home when you are in your car.
- You’ll need a car anyways if you have to get your destination. It will make expense if you are daring to use taxis or rental cars. It will help to put a hole in your wallet or purse.
- Although plane is faster to get at your destination, it’s not convenient to travel in a plane. But if you have interest to go by plane then you must also need your car to pick up or to reach at airport in right time in stead of a taxi as it make extra expensive for you.
- You can also stop your car, when ever you can if you are in long journey. So people like to be in control of their environment. Moving your steering is depends upon you.
