Here are some tips for you to save money with your Rental Car:

- You must always remember not to return the car to the agency until the tank is full. This is because the agency will charge you a lot for refilling the tank.

- You should always go for small cars. They are lot more comfortable, easily manageable and you will be happy and feel safe in.

- Check if there are any upgrade specials available with the rental agency. This could be fun but you should not be totally dependent on it. This is so because most of the rental customer representatives are not too generous.

- You should try to drive as much as possible. This will help you in saving gas too.

- Carry small luggage. This will improve the gas mileage because less your car have to carry around, the less gas it will use so more gas money saving for you.

- Look out for the cheapest gas stations and fill up the car with the cheapest gas. However do this only with the agency's car and not with your own!{mosgoogle left}
