Tuesday, 29 August 2006

The hurly burly topic on saving money on gas is now focused as a leading front line story in print media as well as in electronic media. From the very past we are not investing high prices for a commodity that has not been a major part of people's budgets. In fact fuel/gas is necessary for our daily utility and any how we have to invest on that. If we will track our expenses in monthly basis particularly to Fuel / Gas sections, it will show that our credit card statement goes up by several hundred dollars beyond our expectation. Naturally we will fire to ourselves. Any how we have to realize that we have to deal with the situation rather complaining about the politics and big fat oil companies or any factors.

In fact one could save money if he/she performed proper maintenance and inspection of their vehicle, such as oil and air filter changes, tire rotation and proper inflation etc which depends upon their average IQ and there is no need for an expert to tell them about how to save the money on gas. Even you can get sufficient advices on saving money on gas form mainstream media, online publications and blogs to conventional newspapers.

Here are some of these intelligence-insulting pieces of advice on saving money on gas from the experts:

- A research has been done by State Trooper Association of America (STAA) to focus on "Stay within posted speed limits." That means you can save gas by driving in 45 to 50 MPH. to you vehicles although you will not save time. So you need to be start up you vehicle earlier rather to drive speed to save time. Speed means you are engaging your vehicle's cylinders with more fuel unknowingly.
- Don't go for "overdrive gears". In fact most modern cars already have this feature built in to drive a stick shift, rather than overdrive gears.
- Try to remove excess weight from the trunk. You should have to learn from your Family. Those bodies you routinely push in the back of your black Caddy after a hard day's work really gotta go.
- Your time is more valuable than the 33% premium that you have to pay for gas with performing the bundles your tasks. In fact you can not change your ways now if you did not value your time prior to the gas price hike.
- Especially, those who have good associates as a neighborhood and work in the same place is the right choice to find a commuting partner which actually works for some people. But the rest of the people prefer to PAY their accounting dork three cube down to insect you again about catching a ride to and from work with you.
- You should avoid unnecessary idling to turn off your engine so you can bake in this heat and will able to save 21 cents off your gas bill. Picture this. If you are tired enough after a long day work and you are stop at the peak, try to turn off your engine unless you are a serious tree-hugger. Due to hike in price of gas many gas saving experts are coming out there with lot more cute ideas to enlighten you with their wisdom to save money on gas. In fact there is no such practical way to save money on gas without changing your lifestyle. Even you can take assists from major credit card companies if you are not a complete loser when it comes to personal finances. In fact you can save money in between \$.15 and \$.30 per gallon if you will proceed for one of those MasterCard, Visa, and Discover. You can also visit a website like PumpAndSave.com for a best card. However if you always pay off your monthly balance in full then you should not forget to get a card one of them which will reduce your expenditure. In fact it will not be bad if the saving will \$600 extra in your pocket per year by an average with saving in the neighborhood of \$25-\$50 per month. In a lot of these deals, you can also take advantage of 0% APR for as long as an entire year. You should be serious about saving money on gas. Today price of gas are biting too much. But don't worry the experts are there to give you advice on how to save money at the pump. Then only you can have some fun with it. {mosgoogle left}
